

A woman with dark hair is sitting cross-legged in a light green, teardrop-shaped cocoon hammock. The hammock is suspended between two large trees in a lush, green forest. To the left, there are other colorful cocoon hammocks in shades of blue, red, and orange. The scene is bright and sunny, with dappled light on the grass and trees.

DESIGN · CURVES · RELAX · ADVENTURE · FUN

Designs inspired by Nature  
From conception to creation  
Made for you to enjoy

Cacoonworld, designers of the world renown Cacoon present a new generation of beautiful indoor-outdoor furniture, inspired by the softness of movement found in natural forms and structures. These new designs combine the beauty of steam bent wood with tensile fabric technology, embracing the traditions of west country boat building, sail making and rope work, presented with a contemporary twist.

The idea for the Cocoon was sparked by nature while enjoying a Mexican holiday.

During a jungle trek we came across a colony of Weaver Birds building their tiny hanging nests.

We were immediately struck by their unique beauty. They were so peaceful, so safe and so personal, yet you could hear all the birds still chatting away to each other.

After our long, hot days of trekking we were enjoying some great food and a few margaritas when inspiration struck. A long flight home sketching away followed by months of design development and rigorous testing, our interpretation was complete; the Cocoon.

Just like the Weaver bird, you too can hide away, sheltered and cocooned, but still in touch with your surroundings.

Take some time out and relax. Our Lullio is a perfect open-top nest for adults and kids alike. A little nest or snug for two to share allows you to chill out with a greater sense of connection to your surroundings. Kick back alone or together with a good friend to chat, read, listen to your favourite beats, watch the world go by or just snooze. Beware though, once the kids find out you won't be alone for long they'll soon take it over as their next Star Wars hover bike or to Captain the exploration ship to a parallel universe.

## CACOON ACCESSORIES

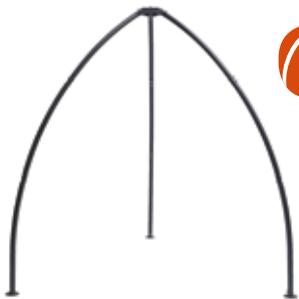

**Cover:** the polyester cover allows you to leave your Cocoon or Songo outside and protect it in any weather.

**Door:** the door fits tightly to create a water barrier, while the generous overlap of canvas will keep out most of what nature can throw at it.

**Bug net:** the bug nets keep those nasty, biting, blood suckers at bay. Keep your Cocoon a bug free space.

**Tripod Steel:** nowhere to hang your Cocoon? No problem. Our cool, stylish Tripod Stand is designed specifically to hold your Cocoon – no matter what its size.

5420015000812

**Wooden tripod:** nowhere to hang your Cocoon? No problem. Our cool, stylish Tripod Stand is designed specifically to hold your Cocoon – no matter what its size.

5420015000560

**Tree-loop:** the Cocoon loves trees and so do we. So, when you hang your Cocoon from a tree branch, please consider using a Tree Loop to stop bark damage.

5420015000546

**Eye bolt:** hang your Cocoon from the ceiling or roof. Our Eye Bolt is suitable for hanging your Cocoon from concrete, natural stones, solid bricks, etc.

5420015000645

# CACCOONWORLD DEVELOPED CACCOON AND NEW PRODUCTS IN OLEFIN

THIS **ULTRA RESISTANT**  
AND **HIGH-END FINISHING MATERIAL**  
IS ADAPTED FOR **HOTEL SECTOR**  
AND **PUBLIC AREAS**

Resistant to UV damage and fading. Olefin applies excellent ultraviolet blocking agents which protect the polymer fabric from the effect of UV radiation.

Perfect for all outdoor applications, Olefin is proven to have an unparalleled ability to withstand the effects of pro-longed exposure to sunlight, wind, rain and humidity. This fabric is protected by an invisible shield around each of its fibres that repels water. This keeps the fabric dry, clean and is easy to wash at the same time.

Reto is our new super-sized, breeze filled, beautiful hang out space. By using two rings, it's got a volume that cannot be matched and with the mesh wall you can really stay in touch with your mates and with nature.

If you find the Cacoon Reto too exposed to the elements and may be need a bit more intimacy... Ok, we have the product for you and here it is "Cacoon Domo".

Domo is big, Domo is friendly, and she is ready for you and your kids.

Domo is available in two sizes and one colour. Reto is made using our tried and tested Cacoon Poly Cotton mix, whilst Domo uses our robust, colourfast Olefin fabric. There is a huge range of accessories to complement every imaginable use.

Songo (Dream in Esperanto) is a more sophisticated take on the Cocoon. The beautiful organic shape of the twin doors blend subtly with the oval base shape affording a more elongated shape better suited to a fully reclining occupant.

Our Songo Vido or Kamelo offer air circulation and are a perfect nest for adults and kids alike a suspended bed to share with two doorways which allow you a greater sense of connection with your surroundings when settled into it. Kick back alone or together with a good friend to chat, read, listen to your favorite beats, watch the world go by or just snooze.

Stop Press: We actually designed something that has two fixing points.

This makes Kamelo totally stable from front to back providing the perfect snooze ship. Just like Songo the twin doors allow a gentle breeze to flow through and you still get the sleepy rocking motion. Unless of course you are actively shooting through the universe in your Kamelo space ship.

5420015000324

THE ART OF SNOOZE

A little bit Cocoon, a little bit Kajito, with a healthy dose of classic rocking chair thrown in, meet Balance, Skal and Roko, new ways to relax.

Introducing the next generation of beautiful indoor outdoor furniture, combining the beauty of steamed wood with tensile fabric technology.

The Kurio range introduces steel into our designs for the first time and you can be sure it won't be the last. As you see we have kept our signature of soft natural curves and flexible fabric surfaces for these products. We couldn't help ourselves with Altaj; no curves, no flexible fabrics. A bit of rebellion is always fresh! She is just way too funky to resist.

ROCK YOUR IMAGINATION

## KAJITO

Introducing a totally new style of Deckchair. Hammocks are great but have a few drawbacks. We have never liked the heavy immovable hammock frames and we also know from our Cocoons that even a single hanging point for a chair can often be a problem.

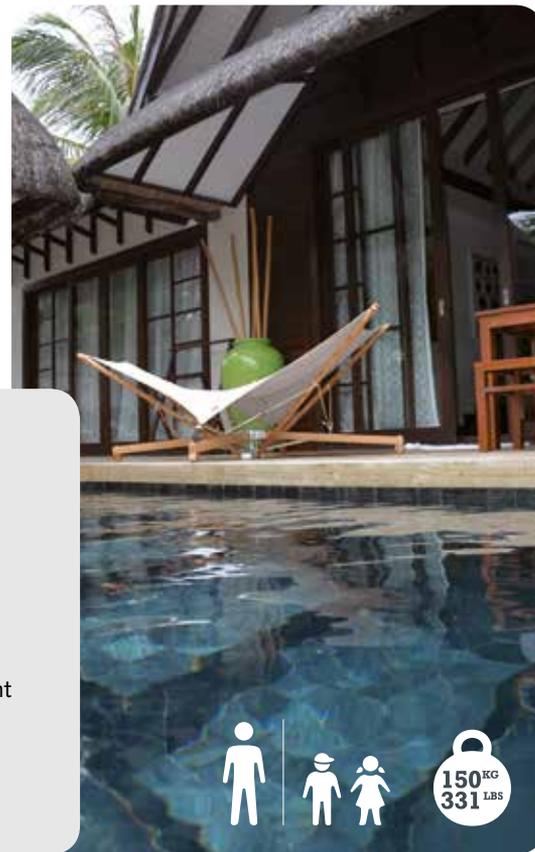

The deck chairs or sunbeds are great too but they have not changed in 100 years. Our only view on this was that the concept could take a bit of spicing up.

Kajito, a new unique folding tensile structure, incorporates the natural shape of leaves and wings with the fabric itself. It's a great fusion of yacht rigging, bamboo furniture and fabric engineering to very comfortably kick back and relax into.

Kajito, this unique hammock style lounge stretches the possibilities of tensile structure. The fabric shape is inspired by the natural shape of leaves and wings. The structure is a fascinating fusion of yacht rigging, sail making and bamboo to provide what is possibly our most comfortable design. Forget o-60 in 15 seconds Kajito goes from a tiny storage space to massive comfort zone in the same time.

THE ART OF SNOOZE

## BALANCE

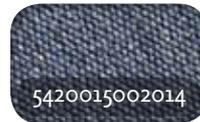

The Balance embraces a new way to relax. You can hang it or put it on the floor, Balance adapts to the way you want to be. Whether you want to curl up with a book, stretch out in the sunshine or rock yourself to sleep by the fire, Balance will always find the optimum position for your comfort. By shifting your position you change the point of balance giving an limitless range of relaxing positions.

Produced in ash wood, with Sunbrella water resistant fabric and delivered with it's hanging system you can also decide to buy a nice stainless steel stand. Perfect for snoozing outside or inside.

## ROKO

Inspired by the Bauhaus School of the early 1900's we combine steel, fabric and timber in our signature curved form. The Rocking motion is enhanced by the free flying fabric seat reminiscent of a traditional deck chair but so very much more stylish and comfortable. Available in our long new Sunbrella Heritage range of fabric this chair will last a lifetime inside or out.

THE ART OF SNOOZE

## ALTAJ 50 & 70

Simplicity... That's the great thing about triangles. This concept has enabled us to produce many different heights, sizes and proportions combining in a sophisticated family of tables and chairs.

The Altaj range has great strength and constructional value in combination with visual simplicity. Did we forget to mention that Altaj also has a really nice springy motion? You probably guessed.

## SEGO

Designed by Louise Charlier, Sego is like a bag that turns into a groundsheet that turns into a seat. No more sore backs and sore elbows when lying down or sitting in the grass. Easy to take everywhere, folded and unfolded in 10 seconds, Sego will be essential to the beach, for picnics, music festivals, fishing and more...

**TAKE IT EVERYWHERE,** OPEN, FOLD AND RELAX

# JIVE® | VISTA®

## JIVE & VISTA TORCH

The main characteristics of GREEN habitat torches is the combination of natural appearance and unique functional design.

Use our design JIVE & VISTA torches to light walkways, pool areas and lounging patios.

The black matt curved, and straight lamp shapes can be fixed on the black wooden sticks to infuse your outdoor space with the warmth of ambient torchlight.

Plant them in the grass or the beach to get a bouquet of light in your garden. And for your terrace you can choose a square concrete base of 10 kg to stabilize it.

Only for outdoor use. Really simple and functional with the push & fill system, the funnel function allows the oil to be refilled. With it, NO DIRTY HANDS anymore...

### Further functions:

- \_ stick can be directly paced in the ground or fixed easily and firmly on GREEN habitat bases;
- \_ cap to extinguish or to protect against the rain;
- \_ cap can be hanged on the stick;
- \_ long life wick does not need to be replaced.

### The torches are made of durable materials:

- \_ lamp body: aluminium;
- \_ wick: glass fibres / long-life;
- \_ stick: beach wood stained in ebony colour;
- \_ base: concrete in black or natural finish.

### Burn time:

- \_ JIVE ca. 4-5 hours.
- \_ VISTA ca. 5-6 hours.

# b o m b o c a <sup>®</sup>

With BOMBOCA GREEN habitat enlarged the fire story for indoor use as well. The ethanol burner brings a warmth ambient flame to indoor and outdoor space plus some warmth as well.

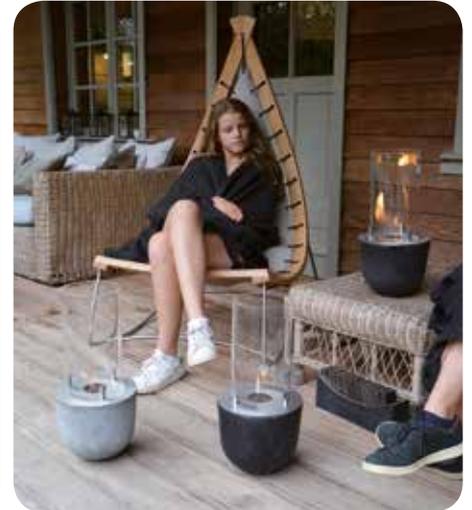

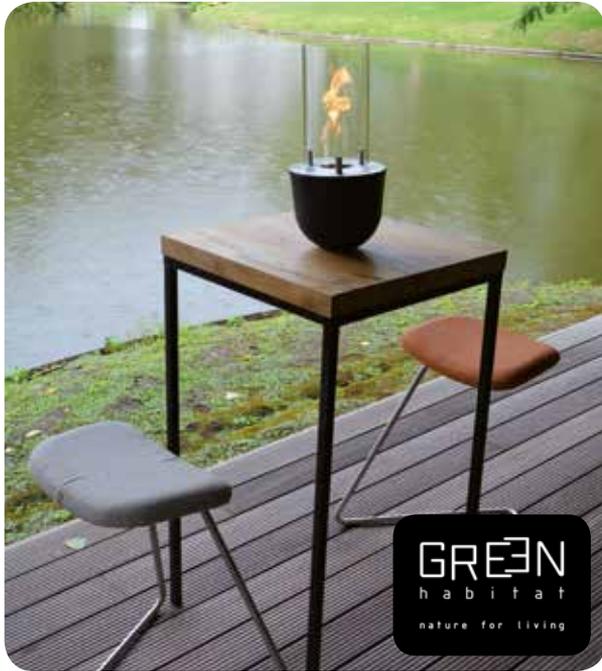

Design is sober, and the combination of materials are, glass, stainless steel and concrete. The colours are available in matt black and natural concrete finish.

The medium size fits to place it on the floor or on a table.

Autonomy of the burner is 3-6 hours and the volume of the reservoir is 1,5 L.

The burner contains a snuffer to extinguish the flame in a safe way or to protect against the rain.

## WARRANTY EXAMPLE, TIPS AND TRICKS

### What is covered?

This warranty covers any fabrication defects (in materials or workmanship), not including installation, during normal use of your cocoon.

Normal use is defined in the instruction manual issued with every cocoon and also sewn into the internal seam inside the right-hand edge of the opening, with the exceptions stated below.

- \* Always check that your cocoon and its hanging system are in good condition and show no signs of damage, wear or tear.
- \* Always ensure that you use a suitable knot to tie off your hanging rope and that your chosen hanging point is strong enough to take at least the same weight as you intend to have in the cocoon.
- \* Always tether your cocoon when it is not in use.

Never exceed the stated load limit or hang the cocoon higher than just above ground level (when fully laden).

Never jump into a cocoon or use it as a trampoline or swing – the cocoon is designed for gentle play and relaxation.

Never hang your cocoon where it can swing into a vertical surface. You will wear the fabric out around the ring.

Never twist or spin your cocoon. It is only designed to hang from the webbing loop without any twists.

Always Remove your cocoon from direct sunlight when it is not in use.

### How Long Coverage Lasts

This warranty runs for two years from the date of purchase (proof of purchase required).

### What is not covered

This warranty does not cover fading or discoloration caused by exposure to sunlight or chemicals such as ammonia, laundry detergent, sea water, or household bleach.

This warranty does not cover any damage caused by contact with any surface that will damage the fabric or the internal ring.

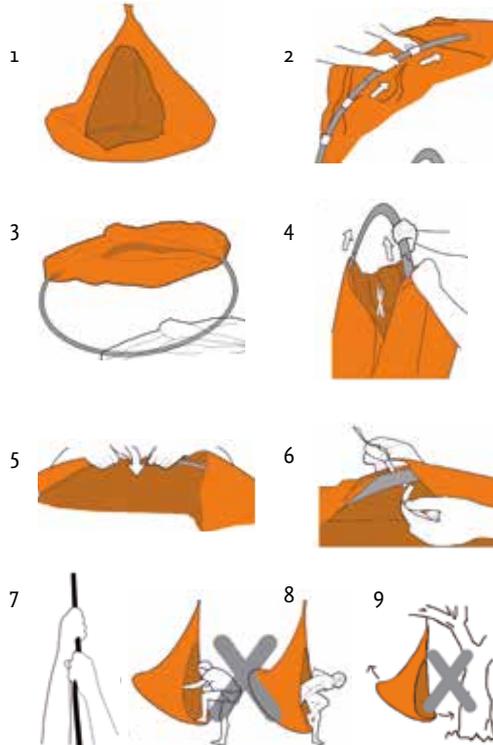

This warranty does not cover any damage caused by inappropriate use of the cocoon

Hang-in-out Design Ltd and all agents and representatives thereof cannot assume responsibility for special, indirect, or consequential damages or contingent liability for use of this product in a manner not expressly intended by the manufacturer.

The end consumer is ultimately responsible for verifying proper installation according to our guidelines herein.

## ASSEMBLY OF THE CACOON

- 1° Place your cocoon on the ground with the door spread open (drawing 1).
- 2° Build the inner ring by slotting together the sections piece by piece whilst feeding them through the guide loops on the inside of your cocoon (drawing 2).
- 3° Once you have fed completed sections through all the loops complete the rest of the ring – you may have to use a bit of force to align and slot together the last two sections (drawing 3).
- 4° Pull the cocoon over the completed ring – using your hands and fingers to lever the final part of the fabric over the ring (the design of the cocoon relies on the ring fitting tightly – so be prepared to use a bit of force) (drawing 4 & 5).
- 5° Using reef knots, secure the last parts of the inner ring to the horizontal seam with the available ties (drawing 6).
- 6° Hang your cocoon – but before you do, check that the branch, beam or bracket is strong enough to take your weight and the weight of any friends who may be joining you (drawing 7).

## APPLY FOR WARRANTY

To apply for warranty you must include the following items in your warranty application.

1. Photographs which adequately describe the warranty issue.
2. Written description of how you think the damage occurred.
3. Proof of purchase including date and retailer.
4. Product name size and colour.
5. Our technical team will assess your application.
6. If your application is valid we will replace your cocoon.
7. If your application is deemed to have been caused by abnormal wear and tear and is invalid we may offer to make a repair at your expense.

There is genius in this idea! That was my impression when, for the first time, I saw a Cocoon. For the past seven years I have had the joy of managing a great team, had opportunity to travel around the world helping to produce products that have a soul. I contribute humbly to the development of our brand and to a company that is growing fast whilst maintaining its core values of quality and customers care. Today, I'm proud to present our new range for 2019. Enjoy your reading!

Patrick Van der Vliet

Our designer Nick McDonald initially trained in hand making fine furniture in Devon England. His design skill was on Sail Design and Tensile Fabric architectural structures for many years. Projects include Round the World Racers and bench mark structures for Kew Gardens in London.

More recently he has combined the disciplines of Sail, Tensile and Rigging to create these innovative designs for the Cocoon range of outdoor furniture.
